

Professor Peter McOwan

Professor Peter McOwan, is a professor in Computer Science at Queen Mary, University of London.

His research career has been characterised by a strong belief in the worth of interdisciplinary study.

His research interests are in the developing and psychophysical testing of theoretical models of visual perception and the development and application of such biologically inspired algorithms to develop novel computer vision architectures.

He is also passionate about promoting the excitement of computer science to the next generation through projects like Sodarace and cs4fn.
