

Simon Humphreys

Simon is the National Coordinator for the Computing At School working (<http://www.computingatschool.org.uk>), which roughly translates to managing the day-to-day activities of the CAS group!.

Simon taught music before a hearing impairment forced a change in direction and he went back to university. Having graduated with a first-class degree he taught A Level Computing in Cambridge. He has worked for the CAS group for four years and has overseen, with colleagues, its development from a small group of 20 to an organisation of over 3000 members.

Simon is also responsible for the development of the CAS/BC Network of Excellence for Computer Science Teaching.
