Dr Glenn Goodall – Head of ICT Research Portfolio, EPSRC

Glenn is responsible for leading the Information and Communication Technologies (ICT) research theme at EPSRC. The team covers a diverse range of research areas, including everything from future communication systems to low-power design devices and the interface of psychophysics and ICT, as well as the underpinning discovery science that supports AI and Quantum technology. Glenn has had several roles within EPSRC in his 8 years there. Originally a polymer chemist, Glenn started at EPSRC in the Energy team, he then moved to the Governance team and then to Head of Impact. Glenn has been the Head of ICT Research Portfolio since December 2021.
